## Cloth Diaper Pre-Washing Instructions

Certain types of cloth diapers need to be washed prior to first use. They include Bamboozles, bleached Chinese Prefolds, and unbleached Chinese Prefolds.

Diaper	Prewash
Bamboozles	2 wash & dry cycles
Bleached Chinese Prefolds	3 wash & dry cycles
Unbleached Chinese Prefolds	5 wash & dry cycles

### Washing

For Top-loaders: Add two tablespoons (2 T.) of liquid laundry detergent. Wash with warm or hot water.

For Front-loaders: Add two teaspoons (2 tsp.) of liquid laundry detergent. Wash with warm or hot water.

### Drying

Dry as normal, using regular heat. Prefolds can be dried on high heat if preferred.

Although the diapers are usable after the initial prewash cycles, they will continue to increase in absorbency through several more washes, until they reach maximum absorption.
